

# Cleco Power LLC

## SASB 2023 Reporting Framework

All data as of December 31, 2023.

Topic	Metric	2023
Greenhouse Gas Emissions & Energy Resource Planning	(1) Gross global Scope 1 emissions, percentage covered under (2) emissions limiting regulations and (3) emissions reporting regulations	(1) 5,554,680 CO2e (2) 0% (3) 100% (Data in Metric Tons)
	Greenhouse gas (GHG) emissions associated with power deliveries	6,201,717 CO2e (Data in Metric Tons)
	Discussion of long- and short-term strategy or plan to manage Scope 1 emissions, emissions reduction targets, and an analysis of performance against those targets	Cleco expects to achieve our interim goal of 60% CO2 reduction by 2030 along with an 85% reduction in NOX and a 90% reduction in SOX by 2030. Cleco expects to achieve Net Zero emissions by 2050.
Air Quality	Air emissions of the following pollutants: (1) NOx (excluding N2O), (2) SOx, (3) particulate matter (PM10), (4) lead (Pb), and (5) mercury (Hg); percentage of each in or near areas of dense population	(1) 4,042 / 57% (2) 3,513 / 39% (3) 314 / 27% (4) 0.11 / 96% (5) 0.01 / 31% (Data in Metric Tons)
Water Management	(1) Total water withdrawn, (2) total water consumed; percentage of each in regions with High or Extremely High Baseline Water Stress	(1) 389,007 Millions of Gallons / 0% (2) -14,560 Millions of Gallons / 0% (Due to discharge of rainfall and impoundment closures)
	Number of incidents of non-compliance associated with water quality permits, standards and regulations	In 2023, Cleco Power incurred three incidents of non-compliance associated with water quality, permits, standards and regulations. All incidents were resolved and preventative measures were implemented. Two of the incidents were related to equipment malfunctions and one incident was related to employee training.
	Description of water management risks and discussion of strategies and practices to mitigate those risks	Cleco is committed to operating all facilities in adherence to all environmental regulations and strives to minimize water usage and consumption. Our annual water usage/withdrawal amounts are directly correlated to the dispatch of our generating facilities. Cleco has committed to a 30% reduction in water usage by 2030.

Topic	Metric	2023
Coal Ash Management	(1) Amount of coal combustion products (CCPs) generated, (2) percentage recycled	(1) 113,928 (2) 171% (Data in Short Tons)
	Description of coal combustion products (CCPs) management policies and procedures for active and inactive operations	Cleco is committed to operating all facilities in adherence to all environmental regulations and strives to minimize waste generation and disposal, including responsible CCP management. The amount of CCPs generated and disposed of by the company annually is directly correlated to the dispatch of our generating facilities which is managed by the Midcontinent Independent System Operator Inc. (MISO) and, as such, is variable in nature. CCPs, including material that has been placed in our disposal units, are considered marketable. Within the company's waste management and recycling program, CCPs are properly stored, marketed and frequently reclaimed from our disposal units.
Energy Affordability	Average retail electric rate for (1) residential, (2) commercial, and (3) industrial customers	<a href="#">Louisiana Public Service Commission Utilities Bill Comparison</a>
	(1) Number of residential customer electric disconnections for non-payment, (2) percentage reconnected within 30 days	(1) 56,786 (2) 91%
	Discussion of impact of external factors on customer affordability of electricity, including the economic conditions of the service territory	Cleco offers multiple programs to assist customers with their bills, such as Budget Billing, Payment Plans, Credit Extension Agreements and Unite Us. In addition, Cleco offers customers assistance via resources from state programs such as LIHEAP and TANF. Residential and commercial Cleco customers can utilize resources available to them through Power Wise, the company's energy efficiency program, which offers weatherization improvements and appliance rebates to customers to help them reduce their energy usage. Finally, Cleco is committed to improving the quality of life in the communities it serves through a robust corporate giving program, through which the company distributes roughly \$600,000 annually to nonprofit organizations across its 24-parish service territory. Employees at the company also donate their time and money through an employee giving and matching program.
Workforce Health & Safety	(1) Total recordable incident rate (TRIR), (2) fatality rate, and (3) near miss frequency rate (NMFR) for (a) direct employees and (b) contract employees	(1) .076 (2) 0 (3) Not Tracked

Topic	Metric	2023
End-Use Efficiency & Demand	Percentage of electric load served by smart grid technology	100%
	Customer electricity savings from efficiency measures, by market	Residential: 19,011 MWh Commercial/Industrial: 15,168 MWh
Activity Metrics	Number of: (1) residential, (2) commercial, and (3) industrial customers served	(1) 251,455 (2) 39,853 (3) 510
	Total electricity delivered to: (1) residential, (2) commercial, (3) industrial, (4) all other retail customers, and (5) wholesale customers	(1) 3,810,410,702 kWh (2) 2,716,867,610 kWh (3) 2,237,774,362 kWh (4) 125,034,984 kWh (5) 2,781,434,000 kWh
	Length of transmission and distribution lines	Transmission Lines: 1,387 miles Distribution Lines: 12,274 miles
	Total electricity generated, percentage by major energy source, percentage in regulated markets	10,250,000 MWh 67.49% Natural Gas 14.06% Coal 1.78% Renewable 100% in Regulated Markets
	Total wholesale electricity purchased	Cleco Power is a member of the Midcontinent Independent System Operator Inc. (MISO) As a member of MISO, all electricity produced by Cleco Power is sold to MISO. All electricity sold by Cleco Power is purchased from MISO.
